

New line of social lockers

- SUM W
- SUS W
- SUL W

Automatic production line

SUM W, SUS W, SUL W are social lockers produced on modern and fully automatic production line. Innovative solutions allow making elements with 0.25 mm precision in 18 seconds.

The line automates processes such as: storage, transport of elements, cutting, bending, welding doors and bodies of a locker.

The main advantage of lockers produced on newline is advanced construction based on closed profiles which are implemented in sides of doors, in the middle of the body and in the bottom of a locker.

Lockers are produced accordingly to current ISO 9001: 2008 and ISO 14001:2004 standards. Lockers are certified, approved and meet EU safety standards.

Powder coating process is held on the biggest in the country, when the number of guns is taken into consideration, automatic line for powder coating, where the highest quality powder is used.
